

### **Jetboil JetLink Accessory Hose**

Think you can't fit your kitchen stove in your backpack? Think again. While not an actual kitchen stove, the Jetboil JetLink accessory hose allows you to create a four-burner backcountry kitchen on the go. The JetLink hose daisy-chains Jetboil and Eureka! multi-burner stoves together to create a large outdoor stovetop and allows multiple stoves to run off a common fuel source and regulator. That's right — make breakfast and coffee at the same time from one fuel source. Measuring 36 inches long, the hose's rugged, braided stainless-steel design holds up to heavy use, and weighs only 9 ounces. Connect Jetboil to Jetboil, Eureka! to Eureka!, or Jetboil to Eureka! cooking systems.
